

SMARTWAVE COMPATIBILITY CHART (Y=YES; N=NO)

For all Configurations below always upgrade to the highest software/hardware revision for gauge/receiver

Gauge Version 200-0179		Rev 2.0 SW: 4.1	REV 1.4 SW: 3.0	REV 1.3 **SW: 2.1	Rev 1.2 SW: 1.6
Receiver Model 200-0184					
Revision X-X	*SW: 4.26, 3.17	Y	Y Note 2	N	N
Revision 1-3	SW: 3.13, 2.2	Y Note 1	Y	Y	N
Revision 1-2	SW: 3.11, 2.17	N	Y Note 3	Y Note 3	Y
Revision 1-1	SW: 3.09, 2.15	N	N	N	N
Revision 1-0	SW: 3.08, 2.15	N	N	N	N
Gauge Version 200-0179		Rev 2.0 SW: 4.1	REV 1.4 SW: 3.0	REV 1.3 **SW: 2.1	Rev 1.2 SW: 1.6
Receiver Model 200-0180					
Revision 1-2	SW: 1.18, 1.5	N	N	N	N
Revision 1-1	SW: 1.15, 1.5	N	N	N	N
Revision 1-0	SW: 2.18, 2.09	N	N	N	N

Hardware change implemented; Hardware Upgrade required for additional features

Receiver Model 200-0153 is not compatible with the above

SMARTWAVE COMPATIBILITY CHART NOTES

*SW: 4.26, 3.17	Limited release; for specific customer applications only; contact Bendix CVS Canada for availability
REV 1.3 **SW: 2.1	Gauges with SW Ver. 2.1 or older should be upgraded to Ver. 2.2 part # 248.0087; contact Bendix CVS Canada for upgrade instructions; does not apply to Ver. 3.0 or higher
1: Some Features not compatible	J1939 Receiver Version 1-3 does not have features such as trailer monitoring and multitire autolearn. Software upgrade on receiver is required to access these additional features.
2: CAN communication limitation; some features not supported	1. This version of receiver is able to send RTS/CTS and BAM sessions simultaneously but the gauge does not support this. This will cause the gauge to initialize improperly. 2. This version of receiver has features such as trailer monitoring and multitire autolearn which this version of the gauge does not support. Software upgrade is required to access these additional features.
3: DTC format change	Because the DM1 version is not recommended by the SAE standard, it is recommended to upgrade receiver to R1-3, which uses latest DTC format and includes additional enhancements.
